New York, NY |  [stan-leiva-davila](#) |  [nessaisling-lab](#)

PROFESSIONAL SUMMARY

Self-taught AI Builder and founder who ships production-grade systems solo and on small teams. Built a native-Rust financial-intelligence terminal (+37% paper-trade ROI) and a privacy-first, on-device voice-to-text app — both cross-platform desktop products. Hardware-fluent (Aircraft A&P coursework, CompTIA A+) with end-to-end ownership from systems and data pipelines through UI and go-to-market. Inaugural cohort of Pursuit’s AI-Native Builder program.

EXPERIENCE

- Nisaba Capital Charting | Founder & Builder**

Apr. 2026 – Present

Native-Rust financial-intelligence desktop terminal merging market data with a Hellenistic astrology engine.
New York, NY

- Built a ~25k-line Rust application solo in 30 days — 12 data APIs, 10 native scrapers, 46 SQLx migrations, an axum REST sidecar, and a Swiss Ephemeris engine validated to sub-arcsecond precision; 132 tests, zero warnings, shipped a v12.2.0 Windows installer
 - Reached +37.06% verified paper-trade ROI; presented at Pursuit Demo Day to staff, fellow Builders, and a Fortune 500 reviewer (legal entity formation and IP filings in progress)
- Architechne | Data Analyst & Partnership Coordinator (1099)**

Sep. 2025 – Mar. 2026

Sourced luxury interior-designer, architect, and residential-developer leads for a NYC design partnership business.
New York, NY

- Built a Python + AI web scraper across NYC tri-state directories and designed a MySQL territory database, cutting manual research time by ~50%
- Airbnb | Self-Employed Property Manager (Owner-Operator)**

Jul. 2017 – Jan. 2020

Ran a short-term-rental business solo for 2.5+ years.
Flushing, NY

- Owned listing, marketing, bookkeeping, vendor coordination, and guest relations end-to-end — the same full-ownership discipline applied to software systems today

TECHNICAL PROJECTS

- Resona / Wisper | Privacy-First On-Device Voice-to-Text**

2026

Cross-platform desktop dictation app: live streaming + file/YouTube transcription, 100% on-device via whisper.cpp.

- Built a real-time pipeline (mic → cpal → energy-VAD → incremental Whisper) plus file and YouTube import with zero cloud STT and no accounts; four selectable GPU backends (CUDA / Vulkan / Metal / CPU) from one Tauri 2 + Rust + React codebase
 - Designed an Ed25519-signed-license freemium model with correct client-vs-server entitlement gating; hardened SSRF and unsafe-export issues (SEC-001/002); co-developed on a PRD + HEART process and shipped v0.2.0-beta.18 across Windows, macOS, and Linux
- Berkshire Hathaway, Reimagined | UX/UI Redesign**

2025

Conceptual redesign of berkshirehathaway.com synthesizing Apple’s HIG with Buffett’s 1996 Owner’s Manual.

- Built a single-file HTML mockup and Figma spec organized around seven paired design principles, meeting WCAG 2.2 AA accessibility with an 8-section written design rationale

EDUCATION

- Pursuit | AI-Native Builder (Inaugural Cohort)**

Mar. 2025 – Present

600+ hour, 7-month in-person intensive shipping production-grade AI products end-to-end.
Long Island City, NY

- Shipped 10+ end-to-end builds and wrote 8+ PRDs; delivered a capstone (Nisaba) at Demo Day to Pursuit staff and a Fortune 500 industry reviewer
- Per Scholas | IT Support — CompTIA A+, Google IT Support, ServiceNow ITSM**

Grad. Oct. 2025

Vaughn College | Aircraft Mechanic Airframe & Powerplant (coursework complete)
Flushing, NY

SKILLS & TOOLS

Languages & Frameworks: Rust (Iced, axum, SQLx, Tauri 2, whisper-rs, cpal), Python, C, C++, Assembly, JavaScript/TypeScript, React, Node, HTML/CSS, SQL (PostgreSQL, MySQL), REST + LLM APIs, WGSL

AI & Tooling: Claude Code, Cursor, Anthropic + OpenAI APIs, whisper.cpp, RAG, prompt engineering, agentic workflows, Swiss Ephemeris

Systems & Ops: Linux, Windows, Git/GitHub, GPU backends (CUDA/Vulkan/Metal), Linux device drivers, hardware bring-up, CompTIA A+, LAN/WLAN networking
